[Divide Fractions And Mixed Numbers Worksheet Pdf](#)

**LESSON 6: Fractions—Multiplication and Division**

**Weekly Focus:** fractions  
**Weekly Skill:** multiplication,  
division

**Lesson Summary:** First, students will solve a word problem involving fractions. In Activity 1, they will practice multiplying fractions. In Activity 2, they do a real-life application problem. In Activity 3, they will practice dividing fractions and mixed numbers. In Activity 4, they will complete various word problems in the workbook. There are an exit ticket and an extra word problem at the end. Estimated time for the lesson is two hours.

**Materials Needed for Lesson 6:**

- 3 Worksheets with answers (attached)
- Video on dividing mixed numbers (length 4:52)
- *Mathematical Reasoning Test Preparation for the 2014 GED Test Workbook Pages 16-17*
- Teacher Note: You may decide to have students complete only part of the worksheet in class and assign the rest as homework or extra practice, depending on your students' needs.

**Objectives:** Students will be able to:

- Solve a problem involving addition and subtraction of fractions
- Multiply and divide fractions and mixed numbers
- Solve an application problem without being told what steps to take (as they would in real life)

**ACES Skills Addressed:** N, CT, SM

**CCRS Mathematical Practices Addressed:** Building Solution Pathways, Make Sense of Problems and Persevere in Solving Them, Use Appropriate Tools Strategically

**Levels of Knowing Math Addressed:** Intuitive, Abstract, Application, and Communication

**Notes:**

You can add more examples if you feel students need them before they work. Any ideas that concretely relates to their lives make good examples.

For more practice as a class, feel free to choose some of the easier problems from the worksheets to do together. The "easier" problems are not necessarily at the beginning of each worksheet. Also, you may decide to have students complete only part of the worksheets in class and assign the rest as homework or extra practice.

The GED Math test is 115 minutes long and includes approximately 46 questions. The questions have a focus on quantitative problem solving (45%) and algebraic problem solving (55%).

Students must be able to understand math concepts and apply them to new situations, use logical reasoning to explain their answers, evaluate and further the reasoning of others, represent real world problems algebraically and visually, and manipulate and solve algebraic expressions.

This computer-based test includes questions that may be multiple-choice, fill-in-the-blank, choose from a drop-down menu, or drag-and-drop the response from one place to another.

The purpose of the GED test is to provide students with the skills necessary to either further their education or be ready for the demands of today's careers.
